To be sure of getting your plants while you are here we should have your order in advance of your coming so we can have them ready for you, as we may not be able to dig the stock while you are here.

Business Information

NOT OPEN ON SUNDAYS. We do not have help to dig stock on Saturdays but if you want to pick up stock on Saturday let us know long enough in advance so we can have it ready for you. Closed 11: a.m. Saturday to Monday morning.

THESE PRICES are in effect Fall 1964, Spring 1965.

ALL OUR STOCK is fresh dug for each order. None of it is in storage except strawberry plants.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists, and dealers. Maryland customers are subject to 3% sales tax or send your License Number. All delivery costs are to be paid by purchaser.

PACKING. Boxes and bales will be charged costs of material and labor used. We will add this cost to your invoice. **This cost applies whether you remit with order or buy on time terms.**

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. **We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company. Claims not made within ten days cannot be honored.**

TERMS. Net, no discount or net 30 days from date of shipment to those of known responsibility **but must have satisfactory business references from others or remittance must accompany order.** Those desiring stock shipped C.O.D. will please remit **one-fourth** the amount of their purchase when ordering. Other terms by special arrangement. 1% per month interest will be charged if not paid when due.

NON-WARRANTY. We give no warranty, expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP, whether by express, motor truck, or parcel post. If by motor truck, tell us the route or over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. **It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or condition of delivery and our responsibility ceases upon our delivery to the transportation company.** We cannot ship by railway freight.

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies to this section.

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible. Of course, there is a regular season for shipping the different plants, but if you want them out of season and are willing to take the risk of good delivery, we will pack with the utmost care and get them off to you at most any time you want them. Risky shipping in hot summer.

Plan to Visit Our Nursery

We will certainly be glad to have you come to see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Delaware, 100 miles from Chesapeake Bay bridge and tunnel via Norfolk, Va., 90 miles from Annapolis, Md., via Chesapeake Bay Bridge, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N.Y. We are on U.S. Route 50, 10 miles east of Salisbury, Maryland, on the Delmarva Eastern Shore.

Ornamental Stock

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate; 250 or more of a variety and size at the thousand rate.

If a variety is listed at 10 rate and not each rate there will be an additional charge of 15 cents per plant if less than 5 are ordered.

Items marked by an asterisk (*) are classed as Lining-Out stock.

SOMETHING WE CANNOT CONTROL

During the summer months we are pleased for visitors to see our nurseries but during the digging season from September to July we **cannot** give callers the attention we would like. During the main digging season, if a customer takes the time of a foreman, it can mean that in his absence several helpers are idle and orders promised for the next few days cannot be handled. Therefore, we urge you to send your orders in to us several days in advance so we may have them ready for you.

ALUMINUM PLANT TAGS

Very convenient to use. Lasts years. ¾ inch wide, 3½ inches long. Made of thin aluminum. Can be embossed with ordinary lead pencil just like writing on an ordinary wood label. Permits writing label right in field. 100 for $3.50, 500 for $15.00, 1,000 for $25.00 Postpaid.

NOT OPEN ON SUNDAYS. We do not have help to dig stock on Saturdays but if you want to pick up stock on Saturday let us know long enough in advance so we can have it ready for you. Closed at 11:00 Saturdays.

This may save you a trip. Don't take a chance but contact us before coming or sending for a load unless your order has previously been received and acknowledged for a certain date.

ACER—ASIATIC MAPLES

SYRINGA PALIBINIANA

This dwarf lilac from Korea must surely rank as one of the finest deciduous rock garden shrubs to come to us from the Far East.

Syringa palibiniana has much to commend it. Given a light, leafy soil with good drainage and a sunny position it will thrive and take many years to reach an ultimate height of about 3 ft. The sweetly-scented, pale mauve sprays are produced abundantly in late spring, and it makes an ideal shrub for pot cultivation in the alpine house.

In spite of such virtues, **S. palibiniana** is still a comparative rarity in gardens.

1 yr. grafted plants $1.00 $7.50 $65.00

This may save you a trip. Don't take a chance but contact us before coming or sending for a load unless your order has previously been received and acknowledged for a certain date.

We are having a very marked increase in sales of Flowering Crabs the past few seasons. Are you using them?

For Connoisseurs

MAGNOLIA WILSONII

A deciduous shrub or small tree, **Magnolia Wilsonii** makes a striking picture in May and June with its large white, pendulous flowers and prominent rosy-purple stamens. The flowers are fragrant and this native of China gives of its best when planted in partial shade, where it will receive some protection from late frosts, which may spoil the splendid blooms. See page 28.

Cornus Kousa blooms a month later than Cornus Florida.

BOXWOOD

Boxwood is another of our specialties and by growing it in the quantities we do, we are enabled to furnish it at these very low prices. This Boxwood is first-class in every way. We have customers who send us repeat orders several times during a season. We know you will like our Boxwood if you will let us send you some of it. **Good Stock, Good Service, and Low Prices.**

CYTISUS BATTANDIERI

A splendid tall shrub, perfectly hardy. The olive-green shot silver leaves are like a Laburnum and the flowers are in cone shaped clusters, which in summer have a scent of ravishing sweetness reminding one of pineapple. The upstanding racemes of bright golden-yellow pea flowers are indeed a beauty to behold.

Our 3-year seedlings bloomed this past season and we are very favorably impressed with it. We have been selling all we can grow and only have the following to offer this season: 2 to 3 ft. at $1.00 each, $7.50 per 10, $50.00 per 100.

DAVIDIA INVOLUCRATA—DOVE TREE

Dr. Ernest H. Wilson describes the Dove Tree in his book "Aristocrats of the Garden" as follows: "The distinctive beauty of the Davidia is in two snow-white connate bracts which subtend the flower proper. They are always unequal in size—the larger six inches long by three inches broad, and the smaller three and one half inches by two and one half inches; they range up to eight inches by four inches and five inches by three inches. At first greenish, they become pure white as the flower matures, the flowers and their attendant bracts are pendulous on fairly long stalks, and when stirred by the slightest breeze they resemble large butterflies or small doves hovering amongst the trees and are so freely borne that the tree from a distance, looks as if flecked with snow."

This is undoubtedly one of the most interesting trees grown. We have been unable to accumulate any sizeable stock, the interest being so great for it. Last season we sold over 400 with only the name and price in our price list. This season we have about 1000, probably again will not have enough. Our price is very reasonable considering the scarcity.

MAPLES

We like to refer you to our collection of Maples especially in lining-out sizes. We believe there will be a good demand for Maples in the future. You will notice many articles being published about them. This always creates a demand—especially when the article is good. We have tried to keep our prices reasonable. See pages 2, 3 and 4.

The Rare Franklinia

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From this shelter emerges four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. **There is a constant succession of blooms till hard frost.** We frequently get the unusual effect of a tree clad in crimson, autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than 3 or 4 feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens 30 feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklinia prefers full sun, has proved entirely hardy about New York and hardy in favorable locations about Boston, Mass., and in Ohio.

We have found the Franklinia does much better if it has plenty of moisture at planting time. See color picture second cover page.

AS GOOD AS CAN BE GROWN

We are exerting effort to produce the very best stock that can be grown, and in our fifty-seven years' experience we believe we have never offered bigger values than we are offering this season. Even with the short supply of Lining-Out stock we have kept our prices at a low level. We feel sure you will be more than pleased with the stock we send you if you give us your order.

We try to secure our propagating wood from only the very best type of plants, and by doing this we can furnish you stock that should be of the best that it is possible for you to get anywhere, regardless of price.

HEATHER

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

FRAXINUS ORNUS

It is still quite uncommon, but it is well worth a place as a specimen tree. In leaf and growth much like the common ash, it yields large flossy panicles of white blossoms which are deliciously fragrant. See page 15.

Be sure to read page 1 carefully before ordering.
Many items in this catalog will undoubtedly be sold out before the season is over. We suggest you place your order as early as possible.

HOLLY (Ilex)

For many years we have been urging nurserymen to grow more holly. Fifteen years ago there was not very much demand for holly. If you will refer to our catalogs about that time and since, you will find we said, "The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell."

Try to buy nice holly now, see how scarce it is. We find demand increasing each season.

	Each	10	100	1000
AQUIFOLIA J. VAN TOL. Another form of English Holly with dark green leaves and occasional teeth. Berries are deep red, large, and showy. Heavy fruiter. One of the best. Probably the best for here in the East.

AQUIFOLIA RIDDLE. Big leaf.				
18 to 24 in. B&B	$3.00	$25.00		
AQUIFOLIA TEUFIL'S SPECIAL. For hardiness, good growing and as a good cutting variety we recommend this.				
3 in. pot plants 2 yr.		$5.00	$40.00	
18-24 in. B&B	$3.00	25.00		
AQUIFOLIA TEUFIL'S ZERO. Mr. Teufil told us this was one of his hardiest ones and a good commercial cut variety. Branches weep or droop.				
3 in. pot plants 2 yr.		$4.00	$35.00	
18-24 in. B&B	$3.00	25.00		
AQUIPERN FEMINA. A cross of Aquifolium and Pernyi with characteristics of both parents. Leaves plentifully toothed and a lustrous green.				
3 in. pot plants 2 yr.	$1.00	$4.00	$30.00	
CORNUTA BUFORDI. A form of Cornuta, but spikes on the leaves are not so prominent and it is more hardy than the type. Berry-bearing.

CRENATA "GREEN CUSHION." Shrub flat, spreading. At 10 years 8 in. with top 30 to 32 in. wide. Leaf blades stiff, dark green, small to very small. Twigs small, light green or slightly tinted with purplish brown. Especially attractive because of its solid cushion-like form.				
* 2 in. pot plants 2 yr.		$3.00	$25.00	$200.00
CRENATA HELLERI. Very compact low growing—foliage is so thick and dense you can hardly put your finger through it—very small leaves. We consider this to be one of the best novelties recently introduced.				
* 2 in. pot plants 2 yr.		$3.00	$25.00	$200.00
6 to 8 in. B&B	$2.25	20.00	175.00

*10 to 12 in. trans.		$3.00	$25.00	
*12 to 15 in. trans.		4.00	35.00	
CRENATA KINGSVILLE. Small leaves dark green. Growth is very twiggy and spreading. A dwarf Holly ideal for rockery or as specimen where slow growing low plant is needed. Very hardy.				
* 2 in. pot plants 1 yr.		$2.50	$20.00	
* 2 in. pot plants 2 yr.		3.00	25.00	
CRENATA LATIFOLIA. Leaves a little wider than the type and of stronger growth.				
*12 to 15 in. trans.		$4.00	$35.00	$275.00
CRENATA LITTLE GEM. Grows broader than tall. A good one for low positions.				
* 2 in. pot plants 1 yr.		$3.00	$20.00	
* 2 in. pot plants 2 yr.		4.00	30.00	

Ilex Crenata Helleri is one of the very good sellers now. Is a dwarf, slow growing, very compact for small places. Looks good all the time.

	Each	10	100	1000
CRENATA "MAJOR" (Bennett Hybrid). Flat leaf, good color of green, heavy grower, very similar to Rotundifolia, but breaks much better.				
*12 to 15 in. trans.		$4.00	$35.00	
CRENATA "MAXWELL" (Bennett Hybrid). Light olive green, slightly convex leaf, spreading growth, slightly more ascending than Ilex Crenata Convexa.				
*12 to 15 in. trans.		$4.00	$35.00	
CRENATA MICROPHYLLA. Tiny leaf Japanese Holly with many twiggy branches making it a dense plant. Fruit is black. Makes an excellent evergreen for low work, and prunes well.

This dwarf lilac from Korea must surely rank as one of the finest deciduous rock garden shrubs to come to us from the Far East.

Syringa palibiniana has much to commend it. Given a light, leafy soil with good drainage and a sunny position it will thrive and take many years to reach an ultimate height of about 3 ft. The sweetly-scented, pale mauve sprays are produced abundantly in late spring, and it makes an ideal shrub for pot cultivation in the alpine house.

In spite of such virtues, S. **palibiniana** is still a comparative rarity in gardens. See prices above.

MALUS — FLOWERING CRABS

The Flowering Crabs are among the most charming of spring trees. They are not only beautiful when in blossom but many carry most ornamental and richly-colored fruit in the autumn. Most of the Crab family form graceful garden trees of medium size. They are quite hardy and require no particular cultivation, thriving best in a good loam and full sunshine.

ODD CHINESE QUINCE

The most striking thing about the Chinese flowering quince is its huge fruit, in comparison with the Japanese quince whose small, irregular, pocket-size fruit is familiar to all. Its flowers and fruit are not abundant on individual plants and the small tree is not especially ornamental. But, no one grows it much. Let us believe, however, that to see the plant with its occasional large fruit is rather thrilling. It may be a solitary specimen that seems somehow misplaced, hung on the plant as an ornament. Its leaves are larger than those of the familiar Japanese species, the occasional flowers are light pink and the lonely fruits about 6 inches. As a real oddity, every nurseryman should have it on his grounds. It can be a reminder of the delicious fragrance of the smaller fruit of the Japanese quince. This Chinese fruit resembles that of a large pear.

Styrax Japonica, a "most valuable small tree." See page 38.

A FASCINATING HOBBY

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breath-taking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are now being offered. If you want a stimulating (and profitable hobby that grows more interesting, beautiful and valuable every year, then grow azaleas.

Many items in this catalog will undoubtedly be sold out before the season is over. We suggest you place your order as early as possible.

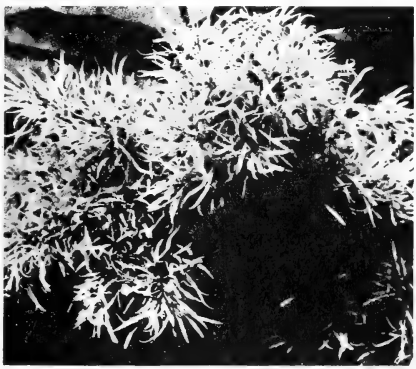
PRUNUS SERRULA

This "cherry" does not deserve a place in the garden for its flowers, but it should surely be seen more often on account of its beautiful peeling bark, the colour and texture of brown satin. A carefully placed specimen will prove to be a focal point in a winter garden and a wonderful foil for colour in a summer one. See page 34.



FRAXINUS ORNUS

It is still quite uncommon, but it is well worth a place as a specimen tree. In leaf and growth much like the common ash, it yields large flossy panicles of white blossoms which are deliciously fragrant. See page 15.

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

For scale and red spider use Malathion.

If your soil is not acid enough we suggest you use Aluminum Sulphate or Sulphur.

EDCO IRON

For experimental use in the control of chlorosis (lack of chlorophyl) in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Full directions for using with each lot.

See page 59 for Azalea rooted cuttings.

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

For scale and red spider use Malathion.

If your soil is not acid enough we suggest you use Aluminum Sulphate or Sulphur.

This nursery was started just 59 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

TAXUS (Yew)

The Taxus are undoubtedly the most popular and useful of all the ornamental evergreens. We have been growing them extensively a good many years and the demand keeps increasing.

We honestly believe you will do well to plant and grow on some of these Yews.

	Each	10	100	1000
Baccata adpressa. A compact Yew growing 4 to 5 feet high, with upright branches and dark green foliage.				
*12 to 15 in. trans.		$3.50	$30.00	
Baccata aurea (Golden English Yew). Leaves golden yellow, more brightly colored at tips and margin. Hardier than type.				
* 8 to 10 in. trans.		$3.50	$30.00	
Baccata Dovastoni aurea pendula. A golden variegated form with drooping branches.				
* 8 to 10 in. trans.		$3.50	$25.00	
Baccata hibernica (Irish Yew). A strictly fastigiate form, with stout crowded upright branchlets; leaves radially arranged around the branches, dark glossy green, more obtuse than in the type. One of the most desirable evergreens of columnar habit for formal gardens. Do not recommend planting north of Philadelphia.				
* 6 to 8 in. trans.		$3.00	$20.00	
Baccata repandens (Spreading English Yew). A low form with wide spreading branches and dull bluish green, narrower and longer leaves, partly falcately curved upward. Hardy in New England and one of the best spreading types. Nobody seems to have enough of these the past few years.				
4 to 6 in. trans.		$3.00	$25.00	
Cuspidata (Spreading Japanese Yew). For any and every purpose in which evergreens are required the Japanese Yew can be recommended. Immune from most diseases and pests. Withstands shade or full sunshine. Dark green at all seasons of the year. Grows broader than tall.

AS GOOD AS CAN BE GROWN

We are exerting effort to produce the very best stock that can be grown, and in our fifty-nine years' experience we believe we have never offered bigger values than we are offering this season. Even with the short supply of Lining-Out stock we have kept our prices at a low level. We feel sure you will be more than pleased with the stock we send you if you give us your order.

We try to secure our propagating wood from only the very best type of plants, and by doing this we can furnish you stock that should be of the best that it is possible for you to get anywhere, regardless of price.

	Each	10	100	1000

Cuspidata nana femina. A heavy berry-bearing type of the Dwarf Yew with good foliage and good growing habit. Your customers will want this when they see it in fruit. Faster growing and not as heavy foliage as Nana.

24 to 30 in. B&B	4.00	35.00	300.00	
Media Hunnewelliana. A natural cross between the Japanese and American Yews. An intermediate between the parents in habit of growth, color of foliage and in general appearance. Hardy, but in winter the clear green of its foliage is masked by a yellowish-bronze pigment.				
*12 to 15 in. trans.		$4.50	$35.00	
12 to 15 in. B&B	$3.00	25.00		
18 to 24 in. B&B	4.00	35.00		
Media Kallay. A newer selection from Ohio. Vase shaped. Good grower and a good green color.				
*12 to 15 in. trans.		$4.50	$35.00	
Media Kelseyi. Begins bearing berries even on small plants. Fairly slow grower; dark green, dense needles of the Nana type. Upright bush. Larger sizes literally infested with bright red fruits. We never grow enough to supply the demand. This and Jeffrey's Pyramidal are very similar.				
* 4 to 6 in. trans.		$2.50	$17.50	
* 6 to 8 in. trans.		3.00	20.00	$175.00
* 8 to 10 in. trans.		3.50	25.00	200.00
12 to 15 in. B&B	$3.00	25.00	225.00	
Media Microphylla. A compact type with short green needles. New. Better try it.				
*12 to 15 in. trans.		$4.00	$30.00	
Media Mioun. This is a selection from Adams Columnaris but instead of growing upright they have a spreading habit similar to Andersoni. Rapid grower.				
*12 to 15 in. trans.		$4.50	$35.00	$300.00
Media Moon's Columnaris. A broad columnar form. Good green foliage. One of the hardier ones.				
6 to 8 in. trans.		$3.00	$20.00	$175.00
8 to 10 in. trans.		3.50	25.00	
Media ovata. Broad, upright in habit, large dark leaf and is unusually attractive throughout the year. Heavy fruiter.				
*10 to 12 in. trans.		$4.00	$30.00	$250.00
*12 to 15 in. trans.		4.50	35.00	300.00
Media Taunton. A low growing heavy, dark green foliaged Yew. This is an unusual type in that its branches start out horizontally and then make an upward growth. We found this growing in Massachusetts and consider it distinct from all other Yews we are growing. Stock very limited. Always a good demand for this one.				
* 6 to 8 in. trans.		$4.50	$35.00	
* 8 to 10 in. trans.		5.00	40.00	
24 to 30 in. B&B	$6.00			
Media Thayeri. A low-growing type. Has good color foliage. One of the really good ones. Similar to Andersoni.				
*12 to 15 in. trans.		$4.50	$35.00	
24 to 30 in. B&B	$5.00	45.00	400.00	
30 to 36 in. B&B	6.00			
Media Vermeulen. Very compact and dense upright grower. Broad base and narrow top. Beautiful pyramid, heavily interspersed with red berries. One of the real good columnar type. A Hicksi type. Some like it better.				
*10 to 12 in. trans.		$4.00	$30.00	$250.00
*12 to 15 in. trans.		4.50	35.00	300.00

30 to 36 in. B&B	6.00	50.00	450.00	
36 to 42 in. B&B	7.50	60.00		
Media Wardi. A selection of the intermedia types growing into a low spreading, very compact plant. Similar to the regular Media variety but foliage is a little finer.				
*12 to 15 in. trans.		$4.50	$35.00	
Media Wellesleyana. Another form of Media making a dense, broad column. Foliage a fine dark lustrous color.				
*12 to 15 in. trans.		$4.50	$35.00	
24 to 30 in. B&B	$6.00	50.00

AZALEAS

Sizes of azaleas are as follows: 2 in. pot plants are a rooted cutting grown in the pot one season, 2 yr. size grown one year in pot and one year in field beds, 3 yr. size have been grown in pot one year and field beds two years and 4 yr. size grown in pot one year and field bed three years.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted to forcing—thousands of them being sold for Easter, Mother's Day, and Decoration Day. They are comparatively easy to grow and make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out-of-doors as far north as Long Island. They are extremely floriferous, and in season, the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

If a variety is listed at 10 rate and not each rate there will be an additional charge of 15 cents per plant if less than 5 are ordered.

Items marked by an asterisk (*) are classed as Lining-Out stock.

GABLE'S HARDIER AZALEAS

Mr. Joseph B. Gable of Pennsylvania has spent almost a lifetime working with Azaleas and Rhododendrons. Many years ago he started breeding azaleas with the hopes of producing a hardier type of evergreen azalea in a good color range than then available. He has had wonderful success and is now recognized as the leader in this field.

As to hardiness: these varieties will average hardier than Hinodegiri and Amoena and much hardier than the other Kurumes. All have lived and flowered in the open field where they have withstood temperatures of twenty below zero and more in the past few winters with only negligible injury to a few. Most of them were uninjured.

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybirds—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the new Gable varieties we are

BELTSVILLE AZALEAS

Here is a group of Azaleas originated at the Plant Industry Station of the U.S. Department of Agriculture at Beltsville, Md. These are mostly good greenhouse flowering varieties as well as being hardy in colder sections. The descriptions of the named varieties are from descriptions furnished by the U.S. Department of Agriculture.

FELDYK AZALEAS

From a famous grower in Holland. Introduced as "the Sweet Pea colored strain." They are crosses between Malvatica and Kaempferi and Japanese Azaleas. Have large bright colored flowers. Force easily, strong growers and very hardy. The blossoms exhibit all the delightful colors we most associate with Sweet Peas. One of the hardest evergreen types we grow.

U.S.D.A. AZALEAS

Some years ago the U.S. Dept. of Agriculture introduced a collection of Azaleas mostly from Japan. We have been growing these Azaleas many years and have selected the following varieties as the best ones in this collection. They are well worth trying.

BENI KIRISHIMA. Old rose, semi-double.

VUYKIANA AZALEAS

A new race of large flowered Japanese Azaleas, produced by crossing hardy Azalea Malvatica hybrids with Azalea Mollis. Sturdy growers, prolific bloomers. From the information we have they are much hardier than the Kurume Azaleas. Flowers range from 2 to 2½ inches. All bloom late mid-season. Plants grow tall.

BEETHOVEN. Large mauve.
* 2 in. pot plants $2.00 $15.00

JOSEPH HAYDEN
* 2 in. pot plants $2.00 $15.00

JOHANN STRAUSS. Single, rose flowers, blotched.
* 2 in. pot plants $2.00 $15.00

MOZART. Rose and lilac.
* 2 in. pot plants $2.00 $15.00

PALESTRINA. We are recommending this to use in place of Ledifolia Alba for a tall growing whitebloomer. Last season when Ledifolia Alba were both bud and bloom killed, Palestrina came through without any wood damage and plenty of white flowers. Try it for a hardier tall white.

NEW U.S.D.A. AZALEAS

The Crops Research Division of the Agricultural Research Service, U. S. Department of Agriculture, hereby releases five azaleas. These varieties were developed by B. Y. Morrison and J. L. Creech at the U. S. Plant Introduction Station, Glenn Dale, Maryland, from a series of crosses made in 1947 and designed to incorporate some of the flower qualities of the Belgian-type azaleas into the hardy Glenn Dale hybrids.

After widespread trials of 96 selections, the azaleas being released at this time are considered to be the most promising for the azalea-growing areas of southeastern United States, from Washington, D. C., to Louisiana, and for forcing in all areas.

Their significant characteristic is in the pastel coloring of the flowers and the heavy texture of the petals. Occasionally the white selections are flecked and striped with red or purple, and some flowers show an irregular degree of doubleness. They flower in the Washington, D. C., area about May 8 to 15. These are suggested for further trial.

Price following varieties	Each	10	100	1000
	$1.00	$7.50	$60.00	

BAYOU (PI 279405). A spreading azalea with leaves narrow elliptic, slightly hairy, dark green. Flowers 2½" across, single but with occasional petaloid stamens, white with occasional scarlet flakes and stripes.

GREEN MIST (PI 279406). A somewhat upright azalea with leaves glossy, narrow elliptic, glabrous. Flowers 2½" across, single, white with a distinct greenish blotch, heavy texture to the flowers. We have found this the hardier of this set.

PINK ICE (PI 279408). A broad spreading azalea, with leaves dull green, large rather obovate, glabrous. Flowers 3" across, double, mallow purple with occasional purple flakes, smooth margins and crisp texture.

WHITEHOUSE (PI 279409). A broad spreading azalea with leaves large, dull green, somewhat obovate, slightly hairy. Flowers 3¾" across, single, white with roundish petals with somewhat wavy margins and overlapping.

DEERFIELD AZALEAS

The following Azaleas were bred with the hope of getting hardier evergreen types. While we do not know how hardy they really are, we are offering them for your own testing.

* 4 yr. field beds XX trans.		6.00	50.00	

SATSUKI HYBRID AZALEAS

We are not sure of the parentage or classification of these Azaleas. Mostly Japanese names and it is easy to misspell them by sound. Will appreciate it if you can help us make the corrections. Many of these varieties we only have a few of, some we have in hundred lots or more. We are still trying to get descriptions of the varieties we are not describing and hope to have it in a future issue. Besides the ones we are offering we have many others in small quantities we are still testing for hardiness and desirability.

A new group from the Chugai Nursery Co. near Osaka, Japan. These are late flowering. Flowers are usually variegated, white or pink ground with red, lilac or purple stripes, white base with colored margin, or purple with white variegation and edge. These need more and wider trial before we can recommend planting in exposed or colder sections.

The following descriptions were furnished us by The Chugai Nursery Company.

GLENN DALE AZALEAS

We began growing these Glenn Dale Azaleas in 1941. During the past few years, since they are becoming better known, the demand has increased rapidly. Most all the reports we get from the growers are very enthusiastic. They are doing well in some sections where the evergreen varieties were not supposed to grow.

Many who have seen our fields of these Glenn Dale Azaleas in bloom expressed their amazement and joy at their size, coloring and quantity of bloom. You folks who have been dealing with us for the past many years know we do not recommend a plant unless we really believe in it. We do suggest you try some of these Glenn Dale varieties if you can grow any of the other evergreen azaleas and while you may have some disappointments we feel sure you will be greatly pleased with their growth and beauty.

These one-like descriptions do not tell you much but we do have a special booklet that describes them much more fully. Sent on request—no charge.

Sometimes when Azalea flowers are described as striped or flaked on white they will appear as a solid color. When this occurs the branch should be cut out. This seems inherent with the variety—not any fault of the nurseryman.

Capital Letters after variety name indicate sizes available in that variety as capital B means 2 in. pot plant size, capital C means 2 yr. field beds XX trans., and so-on. We hope you will understand this system of indicating sizes as it saves a lot of space in catalog. We have been using this system for Crabapples several years and it seems to be working fine.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

BACK ACRE AZALEAS

By B. Y. Morrison

These azaleas are the first of the seedlings grown on personally, with a breeding program that is an extension of one phase of the original Glenn Dale work. They are **not** Glenn Dales, but are more closely related to the satsuki group from Japan.

The breeding program centered and still centers on the production of double flowers that will be hardy for outside work, and in as wide a range of kinds that have white or nearly white centers and colored margins. The doubles are represented in this offering but only a few of those to come. The white or light centered kinds are a mere sample of the range to be available shortly.

These kinds are from parents that are perfectly cold hardy in Washington, D.C. and plants have been tested safely in that area, in Memphis, Tenn., and in the general Atlanta area. In extremely cold winters there was some loss of flower buds.

The usual variation in degree of doubling may be expected on newly set plants, and the variations in light centers will vary considerably until the plants are old enough to have many, small, blooming shoots.

Although they are all happy in the South, they are **not** bred primarily for southern gardens.

Prices Back Acre Azaleas 2 yr. size $1.00 each $7.50 per 10

CORINNE MURRAH. White eye, edged with pale rose pink, very flat flower, and usually stable in having the eye.
ELSIE NORFLEET. Flowers pinkish double 2 to 2½ inches with white center edged with a hue between Rose Doree and Scarlet.
MARGARET DOUGLAS. 2 to 2½ in. flowers, La France centers, margins Rose Doree. Some dots in the blotch area of Tyrian Rose. Some flowers will be selfs.
SAINT JAMES. Three inch flowers. Rose Doree which carries as a salmon pink. When the plants are mature they usually come with a starry white center.
MARIAN LEE. 2½ inch flowers. Pale rose pink center edged with nopal red with white eyes. The flower is flatter than some.
DEBONAIR. Flowers usually about 2 inches. White flushed with La France Pink from the edges inward. A very few dots on the upper lobe.
PAT KRAFT. Dr. Morrison says "this is a honey." Very large 2½ to 3 inches dark red. Very late, dark foliage. A 10-year old plant now not over 2½ feet tall.
THARON PERKINS. 2½ to 2¾ inch flowers. Early. Geranium-Pink dotted with Tyrian Rose. Maximum height probably 3 ft.
TARGET. About 2 to 3 inches across. Single, pure red with small rounded dark green foliage.
WHITEJADE. 2 in. flowers smooth edges, pure white, green in center. This is a superb white.
CORA BRANDT. This is the best double for form, almost like a Belgian frilled on edges; Scarlet Red. Very late. A ten year old plant about 30 in. tall has as much spread.
RACHEL CUNNINGHAM. An early flowering double that carries in garden effect as light scarlet. The Rideaway colors are Rose Doree deepening to scarlet red. 17 to 20 petals, forming a pompom shaped flower. The foliage is rather a light yellow-green and is a little more than semi-evergreen. The mother plant now over ten years old shows a height of 4 feet with a broad spreading habit.

A FASCINATING HOBBY

Growing Azaleas is a hobby which provides an ever increasing source of interest. There are so many species to be had and so many almost breathtaking new hybrids being produced, that one is amazed at the magnificent display that we may have with only a small space of ground and a few of the newer plants that are now being offered. If you want a stimulating (and profitable hobby that grows more interesting, beautiful and valuable every year, then grow azaleas.

Many items in this catalog will undoubtedly be sold out before the season is over. We suggest you place your order as early as possible.

AZALEA ROOTED CUTTINGS

FOR DELIVERY SPRING 1965

We can furnish the following varieties of Azalea rooted cuttings, rooted last summer and fall at $7.50 per hundred, $60.00 per thousand. Not less than 25 of a variety at the 100 rate. Not less than 250 of a variety at the 1,000 rate. THE AZALEA BOOK by Frederic P. Lee and many other distinguished Azalea growers. This book tells more about Azaleas than any other source we know of and it is told in an understandable language so the amateur as well as the professional can easily understand it. If you want to order it and for any reason you are not satisfied we will refund the $8.95 you paid us for it. Price $8.95 postpaid. 324 big pages.

SYRINGA MICROPHYLLA SUPERBA

A new variety of **Syringa microphylla** named **superba**, is said to flower again in early Fall, but primarily it is Spring-flowering. The flowers have the same fragrance as the Daphine, which gives it the popular name Daphne Lilac.

Syringa microphylla, itself, is distinctive for its very small leaves, less than an inch in length, and quite orbicular. The species is called Littleleaf Lilac. This is a small shrub, 4 to 5 feet in height. The plant is graceful, with slender stems. The flowers are in loose trusses, with main ones at the top of stems, and smaller ones along the branches. The entire plant in flower is like a huge bouquet, pleasing and novel. They bloom a little later than the popular hybrids, at the end of May, or in June, and are highly rated by the authorities. Red in the bud, they open soft pink, and bloom freely. This is a new hybrid, and not yet found in many nurseries. See Lilac page 27.

GINKGO PYRAMIDALIS

The variety named **Pyramidalis** may be in leading branches so close together as to make it impossible to thrust ones fingers between them. This is certainly one of the best pyramidal trees grown. The variety **Autumn Gold** has been selected and so named for its brilliant gold color in the autumn. The **Mascula** or male is a broader growing type minus the fruiting which is so objectionable. See page 17.

THE RARE FRANKLINIA

Here is a plant that just keeps growing in popularity. To see the bloom and fall foliage makes one want it in his own garden. This is one of our very best sellers. Good for bloom and foliage effect.

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

For scale and red spider use Volck, one to fifty.

If your soil is not acid enough we suggest you use Aluminum Sulphate or Sulphur.

ZENOBIA PULVERULENTA

For a lime-free, well-drained loamy soil this shrub does equally well in a light or shady position. The waxy, pure white bells are freely produced in June and July and are delightfully fragrant. It is a desirable, almost evergreen, plant and received a first class certificate. See page 44.

EDCO IRON

For experimental use in the control of chlorosis (lack of chlorophyl) in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Full directions for using with each lot.

Prices: 1 lb. $2.30; 10 or more lbs. at $2.00 per lb.

SARCOCOCCA HUMILIS

Its cheerful glossy green leaves intermixed in winter with almond scented flowers and later black berries. Not much over 18" tall, and **ruscifola** broader leaves and red fruits. See page 37.

YUCCA GLAUCA

Similar to Filamentosa. Foliage much narrower and more grasslike but stiff. Flowers on shorter stems and earlier than others. See page 44.

NOTEWORTHY HOLLY

Abundant Fruiting

This is a good time of year to look around to see different varieties of American Holly, to judge of their qualities and desirability. We suggest one named Miss Helen. It has been found to be early fruiting with great abundance; the fruit is a fine glossy red. The tree is of conical habit (not fastigiate), densely branched, and covered with many leaves of dark green. See page 23.

NEW BEAUTYBUSH

An uncommon deciduous shrub of great value is **Callicarpa bodinieri giraldi subincanensis,** growing six to eight feet high. As compared with other species of **Callicarpa,** the height of this variety is of great importance, for it gives better display to the unique distinctive blue berries during November and December, long after the foliage has fallen. But the leaves take on, in autumn, a bright rosy purple hue, harmonizing with the colored berries. It is a plant that thrives in any good garden soil. It is well teamed Bodinier Beautybush. See page 8.

THE JACKMAN POTENTILLA

A fine, shapely, compact, bushy shrub is **Jackman's** variety of **Potentilla fruticosa.** It is particularly good as a low hedge. It is not yet well known, but its continuous display of strawberry-like brilliant yellow flowers, against deeply-lobed leaves, picture an extra good plant. The potentillas have long been used as a pleasing plant, but this particular variety is sure to gain many new friends. See page 32.

CHINESE MAACKIA

Summer-flowering Tree

In the months of July and August, the Maackias are striking flowering trees. The white blooms are in dense, upright clustered racemes. Not a well known tree, it always arouses inquiries from visitors. Our species at this writing is **Maackia sinensis.** This is member of the Leguminose family, recognized by close examination of the little flowers. Introduced to cultivation in 1908, it is still not grown by many. Although not so well known as Amur Maackia, the density of its flowers gives it a distinct appeal. See page 27.

MAPLES

We like to refer you to our collection of Maples especially in lining-out sizes. We believe there will be a good demand for Maples in the future. You will notice many articles being published about them. This always creates a demand—especially when the article is good. We have tried to keep our prices reasonable. See pages 2, 3 and 4.

Short Descriptions of Varieties on Preceeding Pages

ABELIOPHYLLUM. Often called white Forsythia. Pale pink buds opening to white, bell shaped, fragrant flowers in early spring.

ACER PSEUDOPLATANUS PURPUREUM. One of the finest fast growing, pictorial trees. The wing seeds, bright red from July on.

AESCULUS PAVIS RUBRA. Is very beautiful slow growing. The rich crimson flowers are produced during June in panicles up to 6 in. long.

AESCULUS PARVIFLORA. One of the most ornamental shrubs bearing panicles of white flowers in July and August.

A New Book

RHODODENDRONS OF THE WORLD
And How to Grow Them

by David G. Leach

Comprehensive volume (azaleas not included) presents information on landscape uses, cultivation, propagation, pest control, hardiness, greenhouse care and breeding. Full data on species and varieties, including origin, classification, rating, height, color and season of bloom. 544 pages and large ones too.

$25.00, postpaid

Seems like a lot of money for a book but it must have taken almost a fortune in time and money to gather all the information it contains. If you do not know much about Rhododendrons it will tell you about all you need to know. If you are an expert on them it will tell you more.

AUNT MARY'S SWEET CORN

The Sweet Corn Supreme

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for $1.00, postpaid.

$2.00 per pound, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

This nursery was started just 59 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.
